

Giraffes were present in Africa for more than a million years before the first modern humans emerged but now their survival depends on the actions and decisions of people. All photos: John B Doherty/Reticulated Giraffe Project.

The RGP is a partnership between Queen's University Belfast and the Kenya Wildlife Service. It is supported by Anne Innis Dagg, Isiolo and Samburu County Councils, the Oakland Zoo, the People's Trust for Endangered Species, Quercus, Toyota Kenya and Wilderness Lodges.
