

Reticulated giraffes are restricted to the dry savannahs of north-east Africa where other endemic species include Grévy's zebra, beisa oryx, Somali ostrich and the gerenuk. All photos: John B Doherty/Reticulated Giraffe Project.

The RGP is a partnership between Queen's University Belfast and the Kenya Wildlife Service. It is supported by Anne Innis Dagg, Isiolo and Samburu County Councils, the Oakland Zoo, the People's Trust for Endangered Species, Quercus and Wilderness Lodges.
